# XS4 MINI

# ALL-NEW DESIGN

A new generation of products: Jump to tomorrow's access control design standard and ensure that both your building's security and visual appeal are taken to a new level.

Welcome to SALTO.  
Welcome to a new design concept.

Stylish design is a SALTO trademark and with the XS4 Mini, we raise the bar on this already high standard thanks to the XS4 Mini's small, discreet size combined with a modern, clean LED aesthetic. The Mini's smart compactness simplifies installation in virtually any kind of door, complementing any type of atmosphere.

# XS4<sub>MINI</sub> DESIGN

A new generation of products: Jump to tomorrow's access control design standard and ensure that both your building's security and visual appeal are taken to a new level. Welcome to SALTO.

Welcome to a new design concept.

## **WORLD-CLASS ENGINE:**

Stylish design is a SALTO trademark. With the XS4 Mini, we raise the bar on this already high standard thanks to the XS4 Mini's small, discreet size combined with a modern, clean LED aesthetic. The XS4 Mini's smart compactness simplifies installation in virtually any kind of door, complementing any type of atmosphere.

## **USER-CENTRED DESIGN:**

The XS4 Mini has at its foundation countless hours dedicated to studying how users really use access control. For example the new LED was developed to make it easier to see door status. And deeper inside, the antenna was redesigned so that it reads credentials faster than ever and covers the entire area above the handle so that no one has to guess where to present the credential.

## **TECH TOUGH DESIGN:**

The XS4 Mini's sleek plastic reader is available in two colours, and under the cover is the Mini's steel-reinforced frame which provides superior structural integrity. And to make it even easier, the XS4 Mini comes with a wide choice of functional and stylish handles suitable for use on any type of door.

# XS4<sub>MINI</sub> TECHNOLOGY

Technologically state of the art, the XS4 Mini covers your needs today and future needs tomorrow.

## **SALTO FULL COMPATIBILITY:**

SALTO XS4 Mini is 100% compatible with the genuinely pioneering SALTO Virtual Network and with SALTO Wireless Network, as well as of course with the full range of SALTO hardware. The XS4 Mini brings to your property the solution that makes your facility easier to manage and more secure, while also being more comfortable for the people who use the property.

## **ELECTRONIC TECHNOLOGY:**

Significantly more advanced than any other electronic lock on the market, for the XS4 Mini we have employed the latest electronics technology to ensure that your new electronic escutcheon allows you to keep up with the constant output of technological advances. With a much faster microprocessor, 4x greater memory, and exquisitely designed electronics, the XS4 Mini is an innovative marvel.

## **CONNECTIVITY:**

Life is increasingly connected in so many areas and the XS4 Mini keeps up and more with this reality. The XS4 Mini is not just a wireless lock; it is bidirectional at its very essence and has been designed to have maximum connectivity with different types of credentials, types of RFID technology, as well as with other advanced technologies such as NFC. And the innovations continue even to the programming side -- the XS4 Mini uses a wireless Portable Programmer Device (PPD) that communicates with the XS4 Mini via NFC. That the XS4 Mini can also be integrated into other access control systems rounds out the case: the XS4 Mini is your connected lock.

# XS4<sup>MINI</sup> SECURITY

Top security is more than mere product robustness, and the XS4 Mini proves the point:

## HIGHEST CERTIFICATIONS:

With SALTO, rest assured that all our solutions are fully compliant with all the latest regulations for a safe and healthy environment. SALTO solutions have been designed and manufactured to meet not only your current requirements, but our solutions also scale easily to keep pace with your future needs too. Our technological platform ensures your investment today will keep paying off in future.

## TOTAL SECURITY:

The time has finally come to completely forget about mechanical keys. The XS4 Mini is the lock that permits you to easily upgrade from a mechanical locking system to our modern electronic system. Installing the XS4 Mini couldn't be simpler -- just remove the existing handle set and install. No complicated retrofit required. And with the XS4 Mini's affordable pricing, it is even easier to convert all your doors into smart doors for first time. Protect people and property 24/7.

## FIRE:

The XS4 Mini's design for straightforward installation also results in increased levels of security and control because doors maintain their integrity. The XS4 Mini is built in two halves that are fitted together by two long screws. Thanks to this ingenious new no-drill hardware, doors can maintain their fire certificates because no additional drilling, or alterations to the door, are needed.

The XS4 Mini is just the first piece of what the market will soon experience as the latest SALTO game changer: a product range that combines **THE MOST ADVANCED TECHNOLOGY AND CONNECTIVITY IN ACCESS CONTROL WITH A NEW, USER-CENTRED DESIGN STANDARD.**

Other products from the range that will hit the marketplace in the coming months include XS4 One - a long-plate version, as well as a redesigned wall reader, cylinders, and even a new control unit to round out the portfolio.

Great design and great technical features have always been a hallmark of SALTO products. And as this new smart design standard and technologically astute range comes to the market in the coming months, we anticipate further recognition of our position as the product performance leader, as the market responds, "That's a SALTO".

# SALTO XS4 GEO

The new SALTO XS4 GEO cylinder is an engineering marvel that combines outstanding design with all the embedded technological requirements needed to ensure its recognition as the de facto industry standard.

The SALTO XS4 GEO cylinder family combines extensive versatility for all types of markets with its proven adaptability to worldwide standards thereby permitting its effective use in a never-ending series of applications thanks to its long list of features:

**SVN data-on-card** technology inside.

Bring in efficiency and cut out maintenance costs.

**Wireless real-time** control and manage who can open which doors at which times.

**RFID.** NFC & smartcard technology that enable you to integrate all your user's physical security needs into a single credential.

**Powerful software** that makes it easy to set up specific access rights and revise as required, while always leaving behind a reliable audit trail.

**Security + Reliable access control 24/7** that allows you to secure & control virtually every door in your facility.

**Easy to install & use** converting virtually any door into a fully-featured access controlled door allowing you to manage at all times who is able to access what, where and when.

# SALTO XS4 READER

The new SALTO XS4 Reader is much more than just a wall reader. It's the bridge between the online and the offline world. It invokes the SALTO design standard that makes it exceptionally easy for the user, and combined with the SALTO XS4 Controller, it boosts the potential of any property and facilitates its integration with almost any interface.

Plus the XS4 Reader is incredibly efficient from a network and IT architecture perspective, making it easy to install while also providing a host of features and functionality.

**SVN data-on-card** technology inside. Bring in efficiency and cut out maintenance costs.

**Wireless real-time** control and manage multiple doors through one POE Ethernet connection.

**RFID.** NFC & smartcard technology that enable you to integrate all your user's physical security needs into a single credential.

**Powerful software** that makes it easy to set up specific access rights and revise as required, while always leaving behind a reliable audit trail.

**All weather and vandal proof** so that your access control system is prepared for real life conditions.

**Security + Reliable access control 24/7.** Convert virtually any door into a fully-featured access controlled door allowing you to manage at all times who is able to access what, where and when.

User-centred design **to make it easier for users to understand and use their access control system.**

**Easy to install & use** converting virtually any door into a fully-featured access controlled door allowing you to manage at all times who is able to access what, where and when.

# SALTO XS4 ONE

The SALTO XS4 One escutcheon is a revolutionary stand-alone lock thanks largely to the level of technology packed inside that brings together the convenience of an offline point -- easy installation and no wires -- with virtually the same kind of power and performance of an online point.

**SVN data-on-card** technology inside. Bring in efficiency and cut out maintenance costs.

**Wireless real-time** control and manage multiple doors in real-time and cost-efficiently.

**All weather** so that your access control system is prepared for real life conditions.

**RFID.** NFC & smartcard technology enable you to integrate all of your user's physical security needs into a single credential.

**Powerful software** to control who goes where and when, and while leaving behind an audit trail.

**Security + Reliable access control 24/7.** convert virtually any door into a fully-featured access controlled door allowing you to manage at all times who is able to access what, where and when.

User-centred design **to make it easier for users to understand and use their access control system.**

**Future-proof** electronics that are ready for new technologies that can provide additional functionalities.

# RE-DEFINING **OUR GOALS**

SALTO success is measured by customers who are satisfied with our innovations.

Over 10 years ago, when we launched the first ever stand-alone battery-powered electronic escutcheon, SALTO changed the access control market forever. We put an end to complex and expensive wiring. We introduced simplicity and affordability without sacrificing security.

Since then SALTO has equipped over 1.7 million doors with our products, and we continue in our drive to develop superior electronic locking solutions. Unlike most of our competitors, our sole focus is on electronic access control. Because this is all we do, we innovate better and faster.

SALTO works hard to ensure that we stay one jump ahead by providing a differentiated product offering that sets your business apart from the competition. Our single focus on electronic access control drives us to develop innovative products with market leading technology that provide real value to end-users thanks to the quality solutions they provide. At SALTO, we are driven to ensure that our customers today continue to be our satisfied customers tomorrow.
